## Belts for the Sport and Fitness Industry

**We have developed a range of Low Energy treadmill belts giving superior performance on treadmills whether in clubs, hotels, medical centres and our homes.**

We offer a wide range of belting products. By choosing Schiki Belts technology, you can not only reduce your supplier base, you will also have access to our worldwide network of industry and product specialists.

Premium partner

# Schiki Belts solutions for Treadmills

## Main features

- Stable belt construction
- Permanent anti-static
- Resistant to abrasion
- Silent running and excellent grip
- Smooth tracking properties
- Less heat build-up
- Low power consumption
- The Low Energy belts with heat resistant fabric need no lubrication; maintenance free

## Benefits

- Less energy consumption
- Smooth and economical operation
- Operational safety
- No pollution build-up
- Long service life

## Schiki Belting low energy treadmill belt range

Sandblast profile

The running belt is a significant part of a treadmill. Usually the belt is intensively used and needs to be lubricated on a regular basis to maintain constant good and safe running properties. There is always the hassle of too little or too much spraying, and lubricants affect the belt life and energy consumption. The Schiki Belting Low Energy Treadmill Belts **need no lubrication**, they are maintenance free and have a long service life because of the special wax treatment on heat resistant fabric.

- Stable belt construction permanently antistatic
- Low decibel noise construction
- Smooth tracking properties
- Surface profile for good grip on various shoe sole types

**Operational Safety**

- Very low friction underside reduces surface resistance
- Less heat build-up
- Smooth, economical operation

**Less Energy consumption**

- Lubrication not necessary, resulting in less maintenance
- Resistant to abrasion
- No pollution build-up
- Long service life

**Economical use**

- Schiki Belting treadmill belting have a proven track record worldwide

**Proven technology**
